

THE Aesthetic Show 2017 – Scientific Workshops

Friday, July 7, 2017

Session One: 1:00 pm – 2:00 pm

Full Spectrum of Tattoo Removal and Skin Revitalization with Enlighten

**Live Demonstration*

Tahl Humes, D.O. and Jill Lezaic, D.O.

Removing the full range of tattoos and pigmented concerns requires the ideal combination of technologies – the right wavelengths, the right pulse durations and the right energy levels. Join Dr. Humes and Dr. Lezaic as they discuss their experience with Enlighten and perform a live demonstration with this industry-leading technology.

GAIN Presents: Technology Meets Technique

**Live Demonstration*

Shino Bay Aguilera, D.O.

Introducing Restylane® Refyne and Restylane® Defyne. Learn about the latest next-generation hyaluronic acid dermal fillers from the Restylane® Family. This symposium will include live assessments and injections and will discuss the science

behind these new technologies and their ability to help maintain natural expression in motion.

Maintaining the Millennial

**Live Demonstration*

Suneel Chilukuri, M.D.

Millennials are projected to outspend baby boomers in 2017. Dr. Chilukuri explores how to grow old with your patients, capitalize on this market opportunity and increase your bottom line. Learn the procedures Millennials want today and novel approaches to delivering superior outcomes via combination therapy. Methods to maximize patient value and retention, as well as clinical pearls for body shaping, skin tightening and vaginal rejuvenation procedures will be shared. A treatment demonstration and open forum for questions and answers will be conducted.

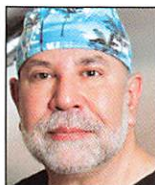

Session Two: 2:15 pm – 3:15 pm

Autologous Lipocyte Micronized Injection (ALMI)

Tess Mauricio, M.D. and Edward Zimmerman, M.D.

The rational, parameters, patient selection, follow-up and success of the ALMI procedure will be presented. A live harvest procedure, an overview on the use of ALMI biocellular grafts for facial rejuvenation / liquid face-lift, ALMI Hair and the ALMI ManShot will be presented and discussed.

New Technologies for Laser Hair Removal: Synchro REPLA:Y Excellium 3.4

**Live Demonstration*

Christian Karavolas

This workshop will cover all facets of laser hair removal and discuss the Synchro REPLA:Y Excellium 3.4 Alexandrite and Nd:YAG laser, including a comparison to all other laser modalities that are in the marketplace for this indication.

There will be a live demonstration showing the speed and efficacy of this laser.

Stem Cells – The Next Frontier in Skincare

**Free Gift Bag*

Ted Lain, M.D.

Stem cell products represent an emerging technology to enhance skincare regimens and innovate the way we confront aging skin. Tensage Stem Cell represents a groundbreaking new product in the revolution of skincare. Dr. Lain will explain how the skin's stem cells keep it healthy and youthful and how all the different topical stem cell technologies work. You will learn how to differentiate the various technologies that call themselves "stem cells" and choose the one that is right for you and your patients. You will leave with a full understanding of how this important new pathway of regeneration works and how to combine stem cell technology with the other pathways of skin rejuvenation – particularly growth factors – in a synergistic approach to providing a comprehensive, advanced regimen for your patients. In this workshop you will learn how Tensage Growth Factor plus Tensage Stem Cell, used together, help mature cells and stem cells with migration, proliferation, differentiation and generation for the purpose of reducing the effects of both photo-aging and chronological aging. Attendees of this workshop will receive a gift bag of Tensage products and a special deal on their first purchase of Tensage products.
